

Profile Rubber

C Profile

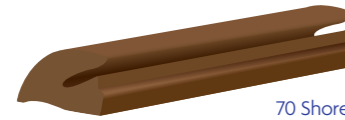

60 Shore

The C profile incorporates all the features of T and D profile plus the unique roll together effect achieved by its proven design. This manages to actually help reduce nicks on the die by increasing sheet strength and in turn aid higher press speeds.

Profile Rubber

Red Soft-C Rubba

25 Shore

Utilising the advanced shape of the standard 60 shore C the soft version is aimed at corrugated board where its 25 shore body will not crush fluting and for the first time corrugated die-cutters will be able to experience the benefits of the 'roll together' the c profile offers.

Red Soft-T Rubba

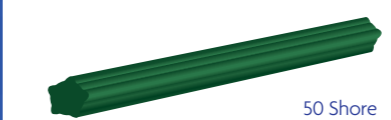

25 Shore

Most people would agree that sponge rubber deteriorates quickly on hot/dry high speed presses and soon loses its effectiveness. However Soft-T due to its unique structure does not and is most suitable where extended ejector life is needed for continuous use.

Punchrubba

Punchrubba

50 Shore

A daisy shaped 50 shore hard rubber which saves time by eliminating costly plugging and rubbering of punches which also can eject waste without piercing it as many spring ejectors do. Designed to be pushed into the punch leaving a 1mm protrusion for optimum efficiency.

Sprint Rubber

Sprinrubba

70 Shore

Sprint Rubba has high resistance to heat. So will not dry out on press or in storage. Unique U.V. resistance! Important as this is a major factor in profile ejector degradation and excellent durability, no noticeable performance reduction after 1.5 million impressions. Self lubrication to reduce board friction. New Flat Top C profile for reduced board bruising with concave base for total stability. Shorter make ready times possible. Fewer nicks needed also reduces dusting, fragmentation and angel hair.

Slot Rubber

Sprint Slot Rubba

70 Shore

With all the elements of Sprinrubba material and its unique concertina shape, Slot Rubber is able to eject waste from small and difficult areas whilst not giving potential rule bursting problems where other slot materials fail. Extruded to either 7 or 10mm in height it also offers precision in width where it is needed most.
