

C&T Matrix introduce new products and solutions to die makers thanks to its acquisition of Clear Group.

C&T Channel Matrix (C&T) is the world's leading manufacturer of creasing matrix and ejection rubber for the print and packaging industries. In February 2022, C&T acquired Clear Group, strengthening its leadership position in die consumables and offering customers multiple benefits in terms of product sourcing.

Injection moulded components are essential parts when producing a die. These additions also

include commonly used moulded parts such as plastic nuts and bolts which are used for die storage and transportation, centreline blocks, distance spacers and edge protectors to protect the dies.

Furthermore, C&T's in-house toolmaking, allows them to design, and now manufacture, bespoke plastic components according to exact requirements.
